阅读下面短文, 从短文后所给各题 A、B、C、D 中, 选出最佳选项, 并在答题卡上将该项涂黑。

There are lots of ways we can look after our planet. Three great ways are "the three Rs": Reduce! Reuse! Recycle! We throw away too many things and make too much rubbish. Lots of the things we throw in the bin take thousands of years to go away. Every time you want to throw something in the bin, STOP and THINK about the three Rs. Can you reduce it? Can you reuse it? Can you recycle it?

**Reduce!**

Reduce paper. Always use both sides of the paper for writing, drawing and printing—we need to save our trees!

Reduce plastic bottles. Fill a reusable bottle with water each day.

Reduce plastic bags. Take your own bag to the shop.

Reuse!

Don't throw away plastic bags. Keep them and use them again.

Don't put old clothes and toys in the bin. Give them to people in need.

Don't throw away coloured paper from presents. Be careful opening the present and use the paper again!

## Recycle!

If we make new paper, glass and plastic from old paper, glass and plastic, we save energy and look after the planet. Don't throw away anything that you can recycle. But use the correct bin!

#### Life in the Future

Recently, science and technology have become increasingly popular among people and have brought about great changes to our daily life. And self-driving technology and intelligent robots will bring revolutionary changes to our future life.

First of all, self-driving technology will free us from driving fatigue, making transportation more efficient and greatly reducing traffic accidents. What's more, intelligent robots will play a huge role. They will be our daily companions, handling complex tasks and bringing us more leisure time.

As far as I'm concerned, life in the future will become more convenient and comfortable with the help of science and technology.
